

# RainBrain

The rainwater harvesting and teaching aid solution for sustainable schools

Harvested rain water can be used to replace up to 50% of all water used in Schools. Use the RainBrain harvesting system to make your school more sustainable and use the digital display panel as a dynamic teaching aid.

## The benefits of rainwater harvesting

- Easy installation
- Low cost maintenance
- Interactive display panel
- Sustainable solution
- ECA approved product
- Quickest payback of all sustainable solutions available

Every step of the way

# RainBrain

## The Interactive Display Panel

- **Digital Depth Indicator**  
displays the depth of water stored in the tank
- **Rotameter**  
visual indicator of flow and quality
- **Digital Usage Indicator**  
indicates the amount of water harvested and used
- **Digital Presentation**  
brief slide show and graphic presentation describing the rainwater harvesting process
- **UV Filter**  
further sterilisation is optional and added where needed
