

Rainwater harvesting  
made simple

**RAINING  
CHAMPION**

**The Code for Sustainable Homes** is a single, national standard used by home designers, builders and architects as a guide to building sustainable homes, and by home buyers to assist in their choice of home.

The Code uses a sustainability rating system indicated by stars to communicate the overall sustainability performance of a home. One star is the Code's entry level, and 6 stars (the best) is the Code's highest performance level.

A rainwater harvesting system, such as the RainRetain Premium Domestic Home system can reduce the water consumption to 80 litres per person per day (systems will vary depending on the specification), achieving a 6 star rating.

Rainwater Harvesting

Don't let rain go down the drain

# Below ground rainwater harvesting systems for the home and garden

NEW! Easy hose connection in tank lid!

## Sizes for every need

- 7 models: 2,700 litres to 13,000 litres (High Water Table tanks are 2,000 litres and 3000 litres)
- Easy and cost effective to transport because of low weight

## Easy to install

- Split tank allows easy access to restricted sites
- Patented quick connection
- Small excavation area
- No concrete backfill needed, saving up to £400 over other tanks
- Telescopic lid – fully adjustable for ease of matching ground level

## Smart design

- Turnable turret system allows the tank to be installed at any orientation as the turret rotates fully to line up with piping
- Uses first class EPDM material in the seals
- Meets WRAS standards for installation in the home (AB air gap)
- Designed in accordance with BS8515:2009
- Pumps switch on and off automatically
- 2 year guarantee on pumps
- 15 year guarantee on tanks
- Lifetime guarantee on filter

## Premium Garden System

Designed to collect rainwater for use in the garden, car washing and general cleaning. Complete with garden filter and submersible pump. Also available as a High Water Table system with a specially designed tank.

### GARDEN FILTER

- Lift out filter for easy cleaning
- Inflow stilling system for controlling the water flow
- Overflow siphon with rodent guard

### GARDEN PUMP

- Submersible or dry mounted suction pump
- 10 metres of pressure hose

## Premium Home System

Designed to collect rainwater for use in the home (in non-potable applications) for laundry, flushing toilets, garden irrigation, car washing and general cleaning. Complete with home filter and wall mounted suction pump. Also available as a High Water Table system with a specially designed tank.

### HOME FILTER

- Self cleaning internal filter
- Inflow stilling system for controlling the water flow
- Overflow siphon with rodent guard

### HOME PUMP

- Dry, wall mounted pump and control unit with automatic switch over to mains. WRAS compliant (prevents cross contamination of mains water and rainwater)
- Wall duct DN 100
